

Central Asia :: Tajikistan

Introduction :: Tajikistan

Background:

The Tajik people came under Russian rule in the 1860s and 1870s, but Russia's hold on Central Asia weakened following the Revolution of 1917. Bolshevik control of the area was fiercely contested and not fully reestablished until 1925. Much of present-day Sughd province was transferred from the Uzbek SSR to the newly formed Tajik SSR in 1929. Ethnic Uzbeks form a substantial minority in Tajikistan. Tajikistan became independent in 1991 following the breakup of the Soviet Union, and experienced a civil war between regional factions from 1992-97. Tajikistan endured several domestic security incidents in 2010-12, including a mass prison-break from a Dushanbe detention facility, the country's first suicide car bombing in Khujand, and armed conflict between government forces and local strongmen in the Rasht Valley and government forces and criminal groups in Gorno-Badakhshan Autonomous Oblast. The country remains the poorest in the former Soviet sphere. Attention by the international community since the beginning of the NATO intervention in Afghanistan has brought increased economic and security assistance, which could create jobs and strengthen stability in the long term. Tajikistan joined NATO's Partnership for Peace in 2002, and became a member of the World Trade Organization in March 2013.

Economy:: Tajikistan

Economy - overview:

Tajikistan has one of the lowest per capita GDPs among the 15 former Soviet republics. Because of a lack of employment opportunities in Tajikistan, more than one million Tajik citizens work abroad, almost all of them in Russia, supporting families in Tajikistan through remittances. Less than 7% of the land area is arable. Cotton is the most important crop, and its production is closely monitored, and in many cases controlled, by the government. In the wake of the National Bank of Tajikistan's admission in December 2007 that it had improperly lent money to investors in the cotton sector, the IMF canceled its program in Tajikistan. A reform agenda is underway, according to which over half a billion dollars in farmer debt has been forgiven, and IMF assistance has been reinstated. Mineral resources include silver, gold, uranium, and tungsten. Industry consists mainly of a large aluminum plant, hydropower facilities, and small obsolete factories mostly in light industry and food processing. The civil war (1992-97) severely damaged the already weak economic infrastructure and caused a sharp decline in industrial and agricultural production. Tajikistan's economic situation remains fragile due to uneven implementation of structural reforms, corruption, weak governance, seasonal power shortages, and the external debt burden. Electricity output expanded with the completion of the Sangtuda-1 hydropower dam - finished in 2009 with Russian investment. The smaller Sangtuda-2, built with Iranian investment, began operating in 2012. The government of Tajikistan is pinning major hopes on the massive Roghun dam which, if finished according to Tajik plans, will be the tallest dam in the world and significantly expand electricity output. The World Bank is funding two feasibility studies for the dam (technical-economic, and social-environmental), scheduled to be completed in mid-2013. In January 2010, the government began selling shares in the Roghun enterprise to its population, ultimately raising over \$180 million but Tajikistan will still need significant investment to complete the dam. According to numerous reports, many Tajik individuals and businesses were forced to buy shares. The coerced share sales finally ended in mid-2010 under intense criticism from donors, particularly the IMF. Food and fuel prices in 2011 increased to the highest levels seen since 2002 due in part to an increase in rail transport tariffs through Uzbekistan. Tajikistan imports approximately 60% of its food and 90% of that comes by rail. Uzbekistan closed one of the rail lines into Tajikistan in late 2011, hampering the transit of goods to and from the southern part of the country.
